Cutting guide

Rib knit fabric

Note) Cut out palm A,
 flip over the pattern,
 and then cut it out again!

★ When cutting out pieces along the fold in the top fabric and rib knit fabric, fold the fabric right side out.
 For marking the fabric, it would be easier if transfer paper was placed between the two layers. Since pieces are sewn with right sides together, it is easier to sew when the markings are on the wrong side of the fabric!

Note) Fold only this part in half.
