Connect via USB to Brother's P-touch Editor software to create label.

Design&Print 2 App and iPrint&Label App

Tested to work with Android™* and Apple iOS®*, these apps allow the customisation and selection of fonts, designs and material to suit any preferences.

The apps can even display the actual text, design and background colours in print preview mode.

* Operating systems: Android™ and Apple iOS®

Expand creativity with a variety of tapes

With a great variety of different tapes to choose from, the possibilities are endless. Create stylish premium, ribbon, decorative and TZe laminated durable tapes that will add an extra flair to home or office.

Premium Tape Range

Add some shine to the organisation with three premium tapes provided in glittery design.

Ribbon Tape Range

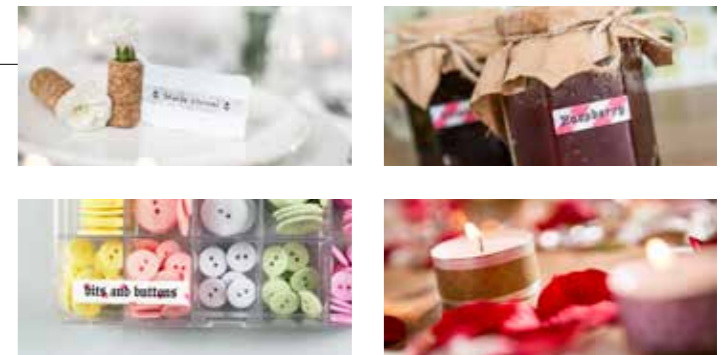

Select from four choices of labels ranging from premium quality to beautiful satin ribbons.

The gold characters on the ribbons are printed using thermal heat transfer technology which do not fade or fall off.

Decorative Pattern Tape Range

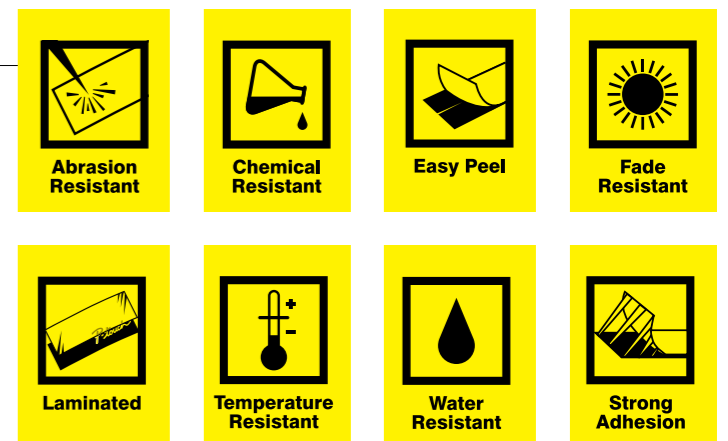

Add a personal touch with durable and unique pattern tapes. With four options to choose from, gifts can be stand out from the rest.

TZe Tape Range

Brother's TZe laminated tapes consist of six layers of materials, resulting in a thin yet extremely strong label. The thermal transfer ink is sandwiched between two protective layers of PET (polyester film), which protects the text against the effects of liquids, abrasion, temperature, chemicals and sunlight.

As the labels have been tested to the extreme, a professional quality label has been designed to last.
