

TD Series Professional Label Printers

Brother's TD series professional label printers provide the flexibility to print high-quality labels on demand.

Print up to 4 inches in width, and with direct thermal printing technology, TD series professional label printers can meet the requirements of a variety of corporate industrial vertical market applications.

TD Series

Seamless Integration

Designed for improved operational efficiency, the high-specification TD series label printers offer a user-friendly experience. These label printers deliver exceptional quality, combining high-speed printing with continuous operation.

With modular design and seamless integration, TD series label printers can function virtually anywhere. Furthermore, compatibility with various printer command languages, such as ZPL II, EPL2, and DPL emulation, ensures smooth integration with existing legacy systems.

Models availability differ by country. Please contact your local Brother Sales office for the models available.

Professional Label Printing

Labels are often required to display important information. TD series label printers can efficiently compile the necessary information and deliver consistent high-quality printouts.

TD series label printers can deliver high print speeds and resolutions up to 300 dpi. Offering versatility, optional accessories such as label peelers or automatic cutters can enable on-demand printing of continuous media in desired lengths.

Brother's P-touch Editor software can create professional labels with its barcode printing, embellished font programming for emphasis, and graphic and data import capabilities for a truly personalised touch.

Direct Thermal Printing Technology

Direct thermal printing is a cost-effective process that is ideal for short-term labelling needs. It utilises a heat-sensitive coating and a thermal print head while eliminating the need for traditional ribbons and ink.

Healthcare, Medical and Laboratory

With strict regulations on the tracking of patient specimens and other items within the healthcare industry, clear and high-quality labelling is essential to maintain safety and traceability.

TD series label printers can implement patient identification, which helps to improve efficiency and reduce human error.

Applications include:

- Appointment cards
- Admission labels
- Specimen and Pathology labels
- Blood bag labels
- Laboratory labels
- Microbiology labels
- Dosage and Drug bag labels
- Wristbands

Warehousing and Logistics

Efficient warehousing operations and worker productivity are crucial to the success of many organisations.

TD series label printers can address this need by printing common and custom label sizes.

This versatility allows for numerous applications within the warehouse, streamlining processes and enhancing worker efficiency.

Applications include:

- Shipping labels
- Carton labels
- Location labels
- Pallet identification labels
- Quality control labels
- Compliance labels

Retail

Easy-to-read labels are essential for consumers to make informed decisions before a purchase.

TD series high-resolution label printers can produce high-quality and professional-looking labels.

These labels feature sharp text, logos, and high-contrast barcodes, enabling faultless scanning at checkout.

Applications include:

- Pricing labels
- Barcode labels
- Pre-packaged food ingredients labels
- Nutrition information labels
- Shelf-edge labels
- Sale/mark-down/discount pricing labels

Brother offers a comprehensive solution to meet label printing requirements. label design apps for desktops and mobile devices allow for easy customisation.

Additionally, a Software Development Kit (SDK) can empower the seamless integration of TD series label printers with existing applications.

Brother can provide all the necessary tools for software developers with printer drivers available for Windows®, with SDK support extending to mobile platforms like Android™, iOS®, and Windows® Mobile.

Software Support Features

P-touch Editor

P-touch Editor software is complimentary and can be downloaded from Brother Solution Center to create custom labels with pixel-perfect precision.

This versatile software boasts over 15 barcode protocols, advanced image dithering for high-quality grayscale images, and has the ability to link with Excel® spreadsheets for efficient batch label printing. With these features, any label designs are possible.

Crop Function

TD series label printers eliminate the frustration of misaligned labels, a common issue when using A4 label sheets with standard printers.

Windows® driver function can streamline label printing. It can automatically scan documents to locate barcodes, extract and print individual shipping or product labels directly from TD series label printer.

Template Mode

Design the required document on a Windows® computer including logos and barcodes.

Transferred and stored the template on TD series label printer's memory. Template can be recalled and any data can be replaced before printing with just a few short commands.

Printer Commands

Extensive emulation capabilities, including ZPL II, EPL2, DPL, and a variety of additional printer command languages, can empower the software developers to integrate TD series label printers seamlessly into any existing legacy system.

(Refer to the specification tables for further details).

Mobile Deploy

A cloud-based app for mobile devices (iOS® and Android™) allows IT administrators to configure and update multiple label printers remotely.

With Mobile Deploy, IT administrator can easily upload any new update packages to an online location, and share the URLs with their users at remote locations for updates.

Software Development kit (SDK)

Brother provides complimentary Software Development Kit (SDK) for easy integration with any third-party legacy software programs.

Download from:

<https://support.brother.com/g/s/es/dev/en/index.html>

Legacy Print Data Conversion

This feature simplifies the integration with the legacy systems by converting the print commands into P-touch Templates.

These templates can be updated externally to a legacy system without requiring any specialist knowledge on the print languages such as ESC/POS or others.

Smooth Print

Smooth Print is an app for printing labels or receipts from iOS® or Android™ mobile devices on TD series label printers.

Smooth Print can work from a user's web app or mobile app via a URL scheme.

The background of the image shows a clothing store. A man in a black t-shirt is looking at a blue shirt on a hanger. A woman in a red top and black jacket is standing nearby. In the foreground, a white and grey label printer sits on a wooden table, printing a label with a barcode and text. Several other labels are scattered on the table. A red and white striped garment is also visible on the right side of the table.
