DS-140

Computerised Sewing machine

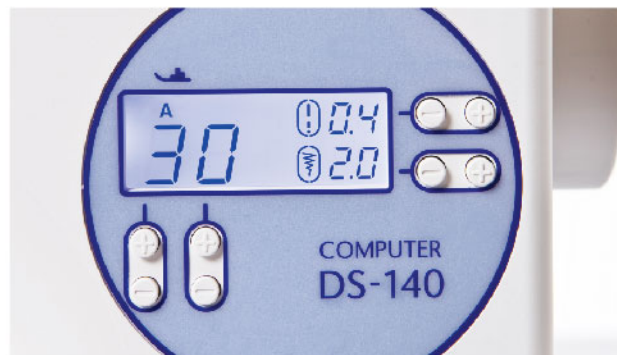

Ultra strong and surprisingly lightweight, the DS series comes equipped with a wide range of computerised sewing features.

- Automatic button holer
- Quick set bobbin
- Back-lit LCD screen with digital stitch length and width controls
- Drop feed setting

Computerised sewing machine expands sewing enjoyment and convenient

LCD screen

LCD screen enables customers to easily recognize important sewing information including stitch width/length and type of presser foot for a selected stitch.

- Simply press buttons to select stitches and to set out stitch length and width.
- Default value is set out for each stitches. So, you can use a stitch at its best suited length and width.

1-step automatic buttonholer

1-step "Auto-size" buttonholer creates a perfectly uniform buttonhole every time. Simply select the stitch and follow the directions to sew all four sides of the buttonhole without moving a lever.

Needle stop position switch mechanism

No need to adjust the balance wheel to lower the needle. Choose the needle down position and rotate the fabric for complete control when stitching corners or needle up when stitching straight seams.

Needle threader

Quick and easy needle threading. Saves time and your eyesight, by automatically feeding the thread through the needle's eye.

Quick-set bobbin

Simply drop in a full bobbin and the Quick-Set feature has you ready to sew immediately.

Seven-point feed-dogs

Extra teeth ensure a smooth feeding action and superior stitch quality. Sew smooth pin point seams on any weight of fabric. From sheer silk to denim.

Presser-foot levelling button

Keeps the presser foot level for smooth, consistent stitching over changing fabric thicknesses, such as the start of a seam or crossing seams.

Drop feed

Drop feed lever for easy lowering of the feed dogs for free motion or free hand sewing used in quilting, embroidery and monogramming.

Twin needle for two-colour stitching

Your machine is designed for twin needle sewing, which allows you to sew with two top threads. You can use the same colour or two different colours of thread for making decorative stitches.

Free arm

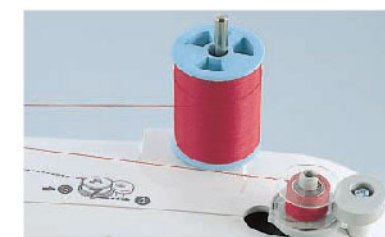

The machine can be turned into a free arm merely by removing the extension table. For sewing round and cylindrical items such as bags and sleeves and for attaching pockets, this feature is extremely convenient.

Dual LED lamp

The convenient lamp makes it easier to work with dark fabrics.

F.A.S.T. bobbin winding system

Bobbin winding is easier. Wind the thread four or five times around the bobbin, pass it through the guide slot, and press the start button. Simple.
