- * Based on using standard address labels, text only, at 300 x 300 dpi.
- ^ Requires connection to a wireless network.
- There is a chance that you can't print in full width depending on your environment. For the details, see our website, support.brother.com. Note: We recommend designing with enough margin, because there is a possibility of cut off if the paper is not fed in straight.

- Automatic Crop function lets on-line sellers easily print product and other barcode labels from A4/Letter size label sheet templates (Windows only)

black text only, at 300 X 300 dpi.

* Based on using standard address labels

The Brother QL1100NWB professional label printer offer unrivalled versatility not only in the office, but also warehouse, postal, facilities management and other industries.

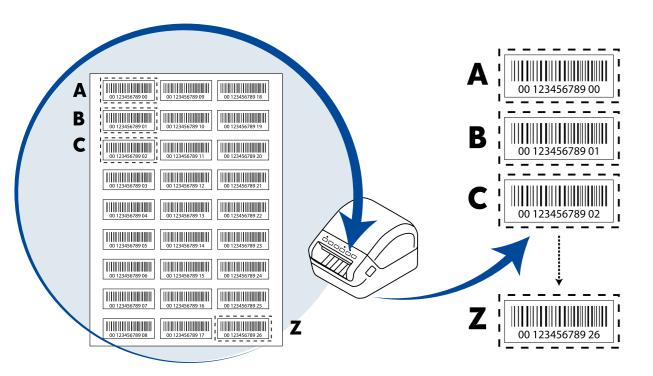

Create labels with black print up to three feet in length, from PC, Mac®, iOS or Android™ devices. All models allow easy connection to desktop computers using USB. The flagship Brother QL1110NWB also adds Wireless, Ethernet and Bluetooth® wireless connectivity.

For developers and systems integrators looking to incorporate label printing as part of their solutions, software development kits for Windows, iOS and Android offer an easy way to add support for the Brother label printers.

Auto Crop Windows only

The Auto Crop feature on the QL1100NWB automatically identifies and crops individual labels (including barcodes) from a A4/
Letter sized sheet and prints each label one by one. You can print the entire sheet of labels to the QL1100NWB individually or
select a section of labels using the snapshot feature and only the selected labels will print individually. This is a great feature for
product labels or other labels that sheet formats are already generated. Now you can easily print only the labels you need quickly.

Software solutions

With label design apps for desktop PC's and mobile devices, and SDK's to integrate the QL range into your own applications, you can choose the best option for your label printing needs.

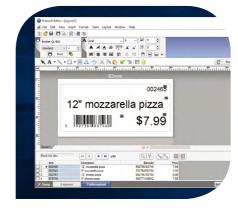

P-touch Editor Lite / P-touch Editor Lite LAN

Built inside the label printer, this easy to use label design software works without the need to install software or drivers. Working like a USB flash drive, simply connect to your PC using USB, and launch the software from the drive that appears. Include images, frames and any of your fonts on your label design and print! A version for network connected models is also available - simply run the software to allow many PC's in an office to print labels to the one printer. Again, no installation needed.

P-touch Editor with Microsoft Office add-in

Design professional labels including images and logos, barcodes and frames. Link to data contained in Excel or .csv files, to print many labels quickly and efficiently. The Microsoft Office add-in lets you highlight, click and print right from within Word, Excel, or Outlook.

Brother iPrint&Label app** for iOS and Android smartphones/tablets

Print labels by using the free iPrint&Label app. Connect via Wi-Fi or Bluetooth®, and choose one of the pre-defined templates or quickly design your label from scratch. This free app is available from your mobile device's app store by searching "Brother iPrint&Label".

Software Development Kits for Windows, iOS and Android

System integrators and software developers can now take advantage of various Brother SDK's that allow easy integration of label printing directly within their own apps and software.

Logistics and warehousing

In busy warehouses and mail rooms, accurate and timely labeling of packages, envelopes and product cartons is essential to ensure the smooth running of all logistics operations. QL1100NWB is capable of printing full size shipping postage labels.
